GOVERNORS TALK ON EMPLOYERS' LIABILITY LAWS

Governor Marshall, of Indiana
Presides Over Deliberations
Today.

Hadley, of Missouri, Introduces
Subject.

NORRIS ON CONSERVATION.

Louisville, Ky., Dec. 1.—At today's session of the governors, most of the time was given over to a discussion of the employers' liability law. Governor Marshall, of Indiana, presided.

Norris on New Nationalism.
When the governors, assembled at their third annual meeting, transferred from Frankfort to Louisville, they found a program which made pleasure paramount, and luncheons, teas and receptions were given considerably more attention than the conservation of natural resources.

Several executives who carried bulging manuscripts in the tails of their "Prince Alberts" in the morning had to transfer them to their "cutaways" in the evening, and finally went to bed without an opportunity to add their views to those already expressed in connection with more or less uniform legislation throughout the various states.

Official Program Changed.

The official program was changed several times, and even with its curtailment only five minutes were devoted to the first business session of the day, but later in the afternoon they got together and had Governor Norris, of Montana, tell them what the people of the northwest think about new nationalism.

"This new school of theorists called 'nationalists' teaches that conservation is a national function, and proclaims that financial benefits shall be national in scope," said Governor Norris. "It seems to us in the west that our brethren in the east bear in mind the case of the peat bog, and, having consumed their substance in riotous use, now want a paternal government to make another division and assign them a part of our patrimony. The last frontier of the national resource prodigal seems naught of justice in this."

Governor Hadley Speaks.
Governor Norris was followed by Governor Herbert S. Hadley, of Missouri, who spoke on "Employers' Liability and Workmen's Compensation Acts," and Gamaliel Bradford, a Boston banker, who had as his subject, "The Power of the Governor."

The late afternoon session extended well into the evening and finally became executive. It was announced that the reception which the Pendergast club had planned for the governors and their families at 9 o'clock in the evening would be postponed until the governors could bring their late conference to a close.

Owing to some rearrangement of the social side of plans, it has been decided to consolidate the business session so the work now mapped out will be completed by tonight instead of Saturday, as was tentatively arranged. Much of the program had been given over to general discussion which can be curtailed so that each subject may be brought up before Thursday night.

FARMERS' UNION AND EQUITY POOL

WILL ACT JOINTLY AND EVENTUALLY WILL CONSOLIDATE.

L. Barnett, state secretary-treasurer, returned yesterday from Central City, where the conference was held. The Farmers' Union was represented by a quorum of the state board, but there was not a complete attendance of the Equity officials.

However, the agreement was reached that the two organizations should co-operate for the sale of this season's pool, and it is certain that later they will be consolidated, although another conference has not been arranged yet. Harmony prevailed at the conference, and the two organizations will sell the pools at the same price, and will work together practically as one organization.

GOOD FELLOWS FILL UP LITTLE STOCKINGS!

WHO WILL PLAY SANTA TO
TO CHILDREN OF
PADUCAH?

**READ THIS RECIPE FOR A
MERRY CHRISTMAS.**

It is up to the Good Fellows of Paducah this year to see that there are no empty stockings in the city on Christmas morning. Right here in Paducah every year there have been many children who bounded out of bed on Christmas morning to find their little stockings empty as the night before, and all the comfort that the sorrowful mother could give was, "Santa Claus must have lost his way; for I am certain that he did not intend to miss you." Sell that did not satisfy the childish hearts; for Christmas without the visit of Santa Claus is not Christmas.

The Good Fellow movement which was inaugurated last year in Chicago has spread rapidly over the entire country, and now Santa Claus annually visits thousands of homes that were overlooked in the years gone by. Last year in Paducah the movement was taken up only a few days before Christmas and it bore fruit; but because of the short period of publicity given it many Good Fellows did not get all the pleasure out of the holidays that they deserved.

But this year every Good Fellow in Paducah will have an opportunity to make one child or as many children as he desires happy. The plan is simple. It is to notify the Philanthropic department of the Woman's club, 214 South Seventh street, having in charge the charity work of the city, how many children of families you can make happy this Christmas. The department will furnish every Good Fellow the names and addresses of the desired number of children, and then the benefactors on Christmas eve will have the license to play Santa Claus. It is a duty that should be performed by every Good Fellow for the sight of the joy that the presents bring to the poor children of the city is worth many times the expense. The department this year will be able to furnish the names and addresses of deserving families, where there are children who are strangers to old Saint Nick.

It is certain that there is a large number of Good Fellows in Paducah, who will be eager to respond to the appeal to fill the empty stockings in Paducah on Christmas morning, and to bring joy into many homes. Last year the Good Fellows reported it the best fun of their lives to see the youngsters enjoy themselves. They enjoyed it more than the gifts that they received themselves.

Of course it is only fair to the children that they should be remembered with some toy, but the real need of many children in the city is for substantial gifts, such as warm clothing.

The Good Fellows will not be published, but the names and addresses of the children will be given to them on application.

Anybody can join the lodge of Good Fellows. Write a letter something like this:

I live at No. street.

I will be Santa Claus to (here write the number of children) children.

Names

Mail or send the letter to the Philanthropic department of the Woman's club, 214 South Seventh street, or the Evening Sun. It will reach the proper person. The names and addresses will be sent to you without publicity. Then get busy and see the joy.

**CIRCUIT JUDGE REED TO
RETURN HERE SATURDAY.**

This is the last week of the regular civil term, but because of the absence of Judge Reed the term will be extended. Business next week will pick up around the court house.

EXPENSES PARED DOWN \$14,000,000

RESULT OF TAFT'S ORDER TO CABINET.

Expected Message Will Be Delivered for Consideration to the Cabinet Tomorrow.

THE PRESIDENT IS PLEASED.

Washington, Dec. 1.—A cut of \$14,000,000 in the estimates for the running expenses of the government during the next fiscal year was reported to President Taft today as a result of his ultimatum to the various heads of departments at the cabinet conference yesterday.

The president was greatly gratified with the showing announced today, but declared there must be a still deeper cut, so the cabinet meeting scheduled for today was postponed until Friday to allow the cabinet officers to make another revision.

The delay in the preparation of the president's message is said to be due to the necessity of waiting for final estimates.

By Friday it is expected the message will be ready for consideration by the cabinet.

Just as soon as the message is out of the way the president will devote the next three or four days to seeing senators and representatives regarding the legislative program. He will not take up the appointments to the supreme court and the court of commerce until the latter part of next week and the judiciary nominations will not be ready for the senate before the second week of the session.

Works Until 3 a. m. President Taft was at work on his message until 3 o'clock this morning. He did not go over to the executive offices today, but remained at work in his study.

The only visitor he saw was President James McCrea, of the Pennsylvania railroad. The call Mr. McCrea said, was purely personal. He said he did not discuss any phase of the message with the president. As to business conditions, Mr. McCrea repeated his statement of a few days ago that business was marking time.

"And," he added, "every man must be his own judge as to what the future is likely to be."

Representative Soren Payne, of New York, called at the executive offices today but did not see the president. As to what the legislative program was likely to be, Mr. Payne declared that any man's guess would be as good as his own.

Former Vice President Fairbanks, of Indiana, is to be a guest at the white house for several days next week. The visit is attracting a great deal of attention politically, and it is expected may have an important bearing upon Republican politics in the state.

GOLDEN BORDER HIGHEST PRIZE

HIGH SCHOOL PUPILS WILL BE AWARDED WITH MERIT CARDS.

As an encouragement for the pupils of the public schools to strive for better records in studies and deportment, certificates of merit will be issued each semester. Formerly honorary certificates were issued to the pupils, who secured high grades in their studies, but a number of years ago the plan was dropped. Superintendent John A. Carnegie re-instituted the plan upon a better basis, and expects to see more pupils striving for the honors.

There are four grades of the certificates of merit, which will be issued twice every year in the high school as well as the grades and primary department. Although the plan was not announced until today it is expected that a large number of certificates will be issued at the close of the present semester while next semester still more will be issued.

The certificate of merit for attendance has a blue border and is issued to the pupil, who has neither been absent nor tardy during the semester. No requirement is made for excellence in studies. The certificate of merit for studies and deportment has an orange border and is awarded to the pupil who has an average grade of excellence in his studies and deportment with no condition for absence or tardiness. The good students who are handicapped by illness have an opportunity, while the pupils who are regular in attendance but not so excellent in studies also have a chance.

To the pupil whose average in

studies and deportment is excellent, and who has not been absent or tardy during the semester, a certificate of high merit is issued. This certificate with a green border is worth two of the other certificates, and represent double the work to obtain one. To the pupil who attends the school during the entire year and whose average in studies and deportment is excellent and has not been absent from classes or tardy a certificate of highest merit is issued. This certificate with a golden border is the most prized, and is well worth the efforts of the pupil.

Not Quite His Pile.

Newport was aroused last month over a story that J. Pierpont Morgan told at a luncheon at the Fishing Club.

"They talk of the high cost of living," Mr. Morgan said, "but it's just as bad abroad. You all know what Trouville is like in the season." "An American took in Trouville's grand scheme last year. When his bill was sent up he paused in his breakfast and studied it with a sarcastic smile. Then he sent for the hotel clerk.

"See here," he said, "you've made a mistake in this bill."

"Oh, no, monsieur, Oh, no!" cried the clerk.

"Yes you have," said the American, and with a sneer he pointed to the total. "I've got more money than that," he said.—St. Paul Dispatch.

The Robber Crab.

In Central America there lives the robber crab, of almost incredible size and somewhat resembling a huge spider. The distance between its extended claws is sometimes as great as twelve feet. It spends the greater part of its life on land and climbs the coconut trees, on the fruit of which it lives almost entirely. It digs in the ground deep tunnels and lines them with coconut fiber. When enraged the robber crab can break a man's limb with its powerful claws. Animals approaching it too closely often receive an ugly pinch which they do not soon forget, and it is on record that one of these crabs has captured and tried to drag off a goat. To open a coconut the robber crab removes the bark from the end containing the three eyes, one only of which is easily penetrated, and, having found this, it revolves the nut against the point of one of its spindly legs until the opening is large enough for it to insert its great claw. With this it breaks the shell, grinds the contents into small pieces and carries them to its mouth.

Blind Like Fiction Only.

A New York woman who is interested in home missionary work thought it would be a good idea to place some religious literature in the various institutions for the blind, provided some one in charge would read it to them. She accordingly visited one such asylum and made the suggestion to the matron. She was received graciously, and the matron said they would be glad to have the literature placed in the library, but that the blind did not care for any kind of serious reading.

"We do read to them, of course," she explained, "but they want only fiction. They do not care for anything else. If we try to read to them books of any other character it is time wasted, for they do not give any attention. No, I do not know why their taste runs to fiction, but probably because it makes the strongest appeal to their imagination."—New York Press.

DIAZ INAUGURATED

TAKES OATH OF OFFICE FOR EIGHTH TIME.

Inaugural Ceremony in Mexico Follows Jeffersonian Simplicity.

Mexico City, Dec. 1.—With simple ceremony General Porfirio Diaz took the oath of office as president of Mexico, for the eighth time, in view of the disturbances, the inauguration was not marked by the usual season of fiestas. The ceremonies were held in the hall of congress. Only the diplomatic corps and a few other distinguished personages, in addition to the high Mexican officials, attend. Following the induction of President Diaz the oath was administered to Ramon Corral, re-elected vice president.

News of Theatres

Double Bill Tonight.

With the double bill "Only a Farmer's Daughter" and "The Yankee Doodle Girl," the Yankee Doodle Stock company will begin a three nights' engagement at the Kentucky theatre at popular prices. This company has adopted the policy of presenting two short plays nightly, instead of one long one, with vaudeville acts between the two dramatic performances. The usual Saturday matinee will be played.

"Traveling Salesman" at Terre Haute. Frank McIntyre and Gertrude Coghlan with the original cast, who will appear here Monday night at the Kentucky theatre in James Forbes' "The Traveling Salesman" played Terre Haute, Ind., Tuesday night, and yesterday morning the Terre Haute Star had the following to say about the performance:

It is hard to believe "nobody loves a fat man" after seeing Frank J. McIntyre, the genial comedian, as Hot Blake in "The Traveling Salesman."

His appearance evidently increased the popularity of the big comedian, for the audience which filled the Grand last night refused to be satisfied with Mr. McIntyre merely in his character. He was insistently cheered after each act and at the close of the third act he made a clever little speech in which he assured the audience their appreciation was not wasted. He is supported by the same clever cast which accompanied him during his previous visits to Terre Haute and it is safe to say that the place is good for several more local engagements.

Gertrude Coghlan was still the same true-hearted Beth as heretofore. She was given an ovation on her first entrance, which was frequently renewed as the play progressed. To theatergoers who have witnessed the play individual mention of the cast is unnecessary as each member is clever and the place lacks the obvious effort to please which marks many plays.

ANNOUNCEMENT!

We Have Taken the Exclusive Agency for the World Famous Guaranteed Shoes

From now on the men of this town will have an opportunity to buy guaranteed shoes. We have made it possible by taking the agency for Desnoyers "Six Months" Shoes—the first and only shoes ever sold under a written guaranty.

The Only Guaranteed Shoes on Earth

Never before has it been possible to buy guaranteed shoes, because never before have guaranteed shoes been made. Heretofore it has been absolutely impossible for manufacturers to make a shoe good enough to guarantee. Their enormous selling expense prevented it. High salaried traveling men, big hotel bills, etc., cost shoe manufacturers over Five Million Dollars a year.

But the Desnoyers Shoe Co. did away with traveling men and their big expenses. They sell direct to dealers by letter, and put the thousands of dollars saved into better leather and other materials. Thus they can afford to make a shoe that's far superior to others and good enough to guarantee.

Desnoyers "Six Months" Shoes

GUARANTEED TO GIVE FULL SIX MONTHS' WEAR

These shoes will be a revelation to the people of this town. They are marvels of beauty, style and shape. Never before have you seen such leather and such wearing qualities.

Here's the Guarantee

If either the soles or uppers wear out within four months we agree to furnish a new pair of shoes entirely free of charge. If either the soles or uppers wear out during the fifth month we agree to refund \$2.00 in cash. If either the soles or uppers wear out during the sixth month we agree to refund \$1.00 in cash. In other words, if these shoes should not give full six months' wear

we refund more than the proportion they fall short.

Best Leather in the World

The manufacturers of the "Six Months" Shoes send way to Switzerland and France for the leathers from which they make these shoes.

The Swiss leathers are tanned from Swiss and Italian, which have the finest and most perfect leather produced anywhere in the world, owing to Switzerland's high altitude and the extreme care with which the Swiss stock is raised. It is protected from all weather conditions and kept clean and healthy.

The Paris Veal hides used for the uppers in "Six Months" Shoes are extremely tough, yet closer grained, softer and more flexible than the hides grown in this country.

The cost of importing these foreign hides makes it absolutely impossible to use them in moderate-priced shoes selling under the old system.

Flexible and Waterproof

Not being satisfied with merely the best sole leather in the world, the makers of "Six Months" Shoes tan all their sole leather by a secret process which makes it remarkably flexible and entirely waterproof.

Best Looking and Best Wearing Shoes Made

"Six Months" Shoes are wonderful in appearance as well as in wearing qualities. They combine style, finish and quality in a degree never before equalled in a shoe selling at anywhere near the same price.

A Quality Shoe Clear Through

"Six Months" Shoes are made with sole leather box toes to give extra strength at the tip. Army duck lining is used, which costs twice as much as ordinary lining, but it is the strongest and smoothest lining made.

The uppers are stitched together by lock-stitch machines using the very highest grade silk thread. Nothing but the

A STYLE FOR EVERY PURPOSE

Desnoyers "Six Months" Shoes are made in the very latest styles for every purpose. There are work shoes, business shoes and dress shoes. And the best styles of each to choose from. You can't lose on a pair, so why hesitate? Call now while our stock is complete.

Most persons have thought of aviation as a dangerous sport and commercial enterprise in which there could never be much assurance of safety in case of an accident. The achievement of flying was supposed to pay for all damages, but judging by the serious effort which the French National Aerial League is making to invent safety devices aviation may yet be comparatively free from danger.

Pneumatic clothes to break a short fall and a specially contrived parachute to retard long falls, measures which are already in the minds of French experts, ought to

so long way toward achieving the desired results. But the work will not stop there. Once science begins the task of making flying machines less dangerous it will advance from one device to another more ingenious and efficacious.

The face that only aviation must drive the interests commercially engaged in the field to extraordinary efforts to eliminate all danger.—Providence Bulletin.

THURSDAY, DECEMBER 1.

Daily Thought.

Serve God by doing common actions in a heavenly spirit, and then if your daily calling leaves you only cracks and crevices of time fill these up with holy service.—Spurgeon.

Even the virtuous commonwealth of Mississippi has a legislative bribery scandal under the probe.

The conservation of Kentucky's natural resources is giving no concern to the house of governors.

Joe Cannon and Champ Clark participated in the Mark Twain memorial in New York City. Mark would have enjoyed that.

There are two million, one hundred, eighty-four thousand, seven hundred, eighty-nine Tennesseans, and two millions of them are pleased over the result of the recent election.

President Taft may not be foolish about that "fourteen feet through the valley" proposition, but he made a hit with that "fourteen millions through the budget" order.

Such are the limitations of even the greatest minds. It is not surprising that a man may fool around in a laboratory all his days until he loses hope of immortality and comes to consider himself but "a plate, a record, a receiving apparatus" for material impressions; nor is it inconceivable that the inventor of the phonograph should eventually discard the theory of the "golden harp" and the choir celestial. Nay, we even suspect that since he concocted this Frankenstein, the haunting strains of his own invention have convinced Thomas A. Edison that we enjoy our hell here on earth.

COME ON, BE A GOOD FELLOW!
This is Good Fellow weather. The poor are suffering. Everybody wants everybody else to have a Merry Christmas. We cannot be truly happy ourselves, when we know someone else is unhappy because we are selfish. That is the way we are constituted. The Philanthropic department of the Woman's club, through the district nurse and the "rest room," 214 South Seventh street, is in touch with the misery of Paducah. Besides looking after the cases of destitution in the city, the department again will undertake the Christmas work. Anyone desiring to give aid to the destitute, to contribute anything for Christmas, or to learn about a family, which he desires to adopt for Christmas, may phone the "rest room" or The Evening Sun and all desired information will be given him. It will be grand thing to adopt a family for Christmas. It will not cost much, and every assistance will be given by the department, in selecting gifts and delivering them, or looking after the whole matter for you. Come on, be a Good Fellow!

THE MADNESS OF DOCK COOK.

If Dr. Cook values his name more than fame, he will find that it is more difficult to regain the former than to attain the latter. Dr. Cook may never have gone far in the direction of the pole; but he had the pole on Perry on the home stretch and beat him to the starting post with his claim; thus reaping a rich harvest of dollars by his speeches and writings. Then he disappeared, like a ringer from the rural circuit.

Can he come back? Is an oft repeated question. Dr. Cook can. Hampton's has offered him, no doubt, a large price for his confession. Having made a fortune off a bogus pretension, the doctor will materially add to his resources by a statement that he was "crazy with the cold" when he made his original claim. Maybe he was; but the cunning of his madness, as exemplified by his hiding on the outskirts of the world until he located Peary and timed his return; his opportune arrival with the news of his bogus accomplishment, his whirlwind harvest of lecture fees, and successful rush to cover just before the grand exposure at Copenhagen, is the wonder of the age. Now, that he has returned to sanity under the soothing influences of comfortable environments paid for by a gullible public at \$2 the seat, he manifests the same proneness for printers' ink.

In the days of Samuel Pepys it was fashionable to go to Bedlam and watch the lunatics of a bright

THE CHEAP AUTOMOBILE TIRE.

(United Press)

Washington, Dec. 1. Tidings from England herald the invention of an automobile tire with all the good qualities of a pneumatic tire but containing no rubber. This remarkable step in the progress of auto improvements is concisely described by General John L. Griffiths in a report from London, as follows: "The springs are made of slightly tapered strips of special steel coiled spirally in such a way that the greater part of each turn is within the preceding one, and that under sufficient compression the whole of the inner coils can be forced within the outermost one. To the surfaces of the links which roll on the ground are cemented blocks of a hard composition of fiber and gutta-percha compacted under pressure, and these it is stated, can be renewed when worn away at a cost of 97 cents to \$1.22 for each wheel.

"The aim of the invention has been to imitate the action of the

pneumatic tire. An obstacle such as a stone does not cause the whole wheel to rise, as in the case with an ordinary iron-tired wheel, but as it were, swallowed up, the link or links immediately effected yielding by virtue of the hinges and bracing into play the resiliency not merely of one or two of the springs, but of the whole of them round the entire circumference.

"The wheel is intended for use on heavy commercial vehicles and motor omnibuses, to give them the benefit of the pneumatic tire with the employment of no particle of rubber. Another advantage claimed is immunity from side slip, while dust is sucked up to a much smaller extent than with pneumatic tires.

A short run in London traffic on a pleasure car experimentally fitted with these wheels showed that they afford a remarkable degree of resiliency, and it is stated that their effectiveness is enhanced at high speeds."

Sunday afternoon, and the attendants reaped much gain from the performances. This mad scene of Dr. Cook's, we trust, will prove equally profitable to him and to his exploiters. Later the doctor may be convinced that honest confession, besides being good for the soul, is profitable likewise, and may tell us at a cent a word that he lied about climbing Mt. McKinley.

If the cold made Cook mad, and his admirers excuse him on that plea, can't they in common charity admit that Peary was "crazy with the heat," when after 25 years of struggle crowned with final attainment of his goal, he found an impostor had beaten him back to civilization and laid claim to his honors?

Cotton in Kentucky.

In Fulton county, in the extreme southwestern section of Kentucky, the farmers are growing cotton with great success. In one day recently two ginning companies at Hickman paid out nearly \$20,000 for cotton. This would indicate that many farmers in that vicinity are enjoying prosperity by reason of their efforts in the cotton-growing line.

In view of the experience of Fulton county growers it would appear that farmers in other sections of Kentucky could afford to devote some thoughtful attention to the possibilities of cotton raising.—Courier-Journal.

DRAIN HOLLOW OR BE PROSECUTED

ORDER OF BOARD OF HEALTH TO PROPERTY OWNERS.

Also Crime of Bradshaw Creek Will Be Traced to Its Source by Officials.

CLANDESTINE SEWER EXPOSED.

The hollow bounded by Caldwell, Norton and Ninth and Tenth streets, which resembles a small lake in rainy weather, was declared a nuisance yesterday afternoon by the board of health and Health Officer Holland was empowered to get warrants for the property owners, who, if they fail to abate the nuisance, will be sued for the cost of the improvement made by the city. The pond is the most unsightly and dangerous of places in the eyes of the health department. The nuisance can be remedied by draining the low ground or filling it with earth. During the summer Dr. Holland says a terrible stench arises from the pond and it is a breeding place for mosquitoes and germs. Attorney W. F. Bradshaw, Jr., who is a member of the health board, is of the opinion that the property owners are liable and if they refuse to make immediate improvements the city will do the work and bring suit against them for the cost.

Another sanitary matter which may eventually terminate in a law suit, is the condition of the storm water sewerage on Jefferson street, Broadway and Fountain avenue. The system was built years ago by property owners at their own expense after obtaining permission from the city. In the past few months Dr. Holland has found that dry wells have been connected to the system which causes a sickening odor to arise from the intakes. City Engineer Washington told the board of health yesterday the only solution to the problem is to dig up the entire sewer. Those who are running their sanitary sewerage into the pipes will be prosecuted. Dr. Holland has been unable to find who has made connections. A short time ago property owners and plumbers were summoned before City Judge Cross, but swore they knew nothing of connections. In two cases Dr. Holland found colored plumbers had made connections, which were immediately broken. But the odor still arises from the sewer. City Engineer Washington is instructed to take up the sewer, which will be the only way of finding the connections.

Dr. Holland is anxious to have Pa-

She numbers many friends among her acquaintances at Walnut Hill. The groom is the son of Mr. and Mrs. T. J. Dooley, of Walnut Hill, a great grandson of James S. Conway the first governor of Arkansas, and is known and admired by nearly all the people of the vicinity. Some very beautiful presents have been given the happy pair.

EAGER TO WORK.
Health Regained by Right Food.
The average healthy man or woman is usually eager to be busy at some useful task or employment.

But let dyspepsia or indigestion get hold of one, and all endeavor becomes a burden.

"A year ago, after recovering from an operation," writes a Michigan lady, "my stomach and nerves began to give me much trouble."

"At times my appetite was voracious, but when indulged, indigestion followed. Other times I had no appetite whatever. The food I took did not nourish me and I grew weaker than ever."

"I lost interest in everything and wanted to be alone. I had always had good nerves, but now the merest trifle would upset and bring on a violent headache. Walking across the room was an effort and prescribed exercise was out of the question."

"I had seen Grape-Nuts advertised but did not believe what I read at the time. At last when it seemed as if I was literally starving, I began to eat Grape-Nuts."

"I had not been able to work for a year, but now after two months on Grape-Nuts I am eager to be at work again. My stomach gives me no trouble now, my nerves are steady as ever, and interest in life and ambition have come back with the return to health."

Read "The Road to Wellville," in plain, "There's a Reason." Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

music lovers and music critics. The stage was effectively arranged with palms, ferns and flowers, many of the latter being gift-flowers to the popular young musical artist, who also received an exquisite shawl of pink roses at the close of the recital. Receiving the guests at the door were little Misses Marie Berry, Frances Sugg, Kathleen Palmer and Frances Adams. Misses Mamie Purchase and Lalla Standrost were the ushers.

It was Miss Scott's first appearance in public since her return from Nashville, where she recently spent several months in taking a special course of piano and organ. She is a gifted musician and interprets with a sympathetic charm as well as a perfection of technique. Miss Scott was assisted by her brother Mr. Robert Scott, whose satisfying voice was never heard to more splendid effect. His rendition of Mrs. Browning's exquisite little love-poem "Unless" was especially beautiful. The program which was admirably arranged to give pleasure, showed a fine talent of selection, as follows:

1. Mountain Scenes Donneo

ATTEL WINS

CALIFORNIA ABE WHIPS PHILADELPHIAN.

Will Moore Easily Defeated in Ten Round Go in New York City.

New York, Dec. 1.—Abe Attel, of California, easily defeated Will Moore, of Philadelphia, in a ten round bout.

Moore was outclassed from the start by the featherweight champion and at the last bell Abe's only mark was a slight trickle of blood from the nose while Moore's face was terribly bruised and both eyes closed.

In the fourth round Moore went down for the count of nine. Attel went down in the seventh, and sat in the middle of the ring with his legs crossed, waiting for the count of nine, then he jumped up. Moore landed left and right to the head in the opening of the tenth, bringing blood from Attel's nose. This angered the champion and he fought furiously for a knockout, but without avail.

While there is life there is hope for everybody but the undertaker.

Banderine

GROWS HAIR
and we can
PROVE IT!

A lady from Minnesota writes:
"As a result of using Banderine, my
hair is close to five feet in length."

Beautiful Hair At Small Cost

HAIR troubles, like many other diseases, have been wrongly diagnosed and altogether misunderstood. The hair itself is not the thing to be treated, for the reason that it is simply a product of the scalp and wholly dependent upon its action. The scalp is the very soil in which the hair is produced, nurtured and grown, and it alone should receive the attention if results are to be expected. It would do no earthly good to treat the stem of a plant with a view of making it grow and become more beautiful—the soil in which the plant grows must be attended to. Therefore, the scalp in which the hair grows must receive the attention if you are to expect it to grow and become more beautiful.

Loss of hair is caused by the scalp drying up, or losing its supply of moisture or nutriment; when baldness occurs the scalp has slowly lost all its nourishment, leaving nothing for the hair to feed upon (a plant or even a tree would die under similar conditions).

The natural thing to do in either case, is to feed and replenish the soil of scalp as the case may be, and your crop will grow and multiply as nature intended it should.

Knowledge's Banderine has a most wonderful effect upon the hair, and cures all the scalp diseases. It is the only remedy for the hair ever discovered that is similar to the natural hair foods or liquids of the scalp.

It penetrates the pores quickly and the hair soon shows the effects of its wonderfully exhibiting and life-producing qualities.

One 25-cent bottle is enough to convince you of its great worth as a hair growing and hair beautifying remedy—try it and see for yourself.

NOW at all druggists in three sizes,
25c, 50c and \$1.00 per bottle.

FREE To show how quickly Banderine acts, we will send a large sample free by return mail to anyone who sends this free coupon to the

SAYS HOUSE OF LORDS IS DEAD

LORD ROSEBERRY MAKES STARTLING STATEMENT.

Balfour Quits Tariff and Suddenly Throws Issue Over—British Campaign On.

SUFFRAGISTS' AND CHURCHILL.

London, Dec. 1.—The present election campaign is one of amazing changes. Lord Lansdowne's unexpected presentation of a scheme for the reform of the house of lords has been surpassed in suddenness by Balfour's throwing over of the tariff reform as an issue of the elections. Lord Roseberry, in a speech at Manchester, said:

"The house of lords has ceased to exist; it has surrendered its powers to the nation. This is a fact of enormous importance."

Roseberry admitted that it was a death-bed repentance, but contended that a death-bed repentance, if sincere, was valid and valuable.

Balfour's adoption of the referendum is generally attributed to the pressure of the influential section of free traders led by Lord Cromer, although it is acclaimed by the bulk of the Unionist party as a master stroke of skillful election. The opposition leaders change of tactics took the older Conservatives aback and caused consternation among the ardent Protectionists.

The liberals, on either hand, characterize his attitude as adroit slipperiness and opportunism. The liberal leaders, who are surprised as much as the Conservatives, have not had time to adjust themselves to the changed conditions.

David Lord-George, chancellor of exchequer, speaking at Llandrindod Wells, reiterated that the cost of a referendum would be \$10,000,000. It was a mere device, he said, to put a more effective weapon in the hands of the wealthy classes. The liberals would have done it.

Augustine Birrell, chief secretary for Ireland, speaking at Bristol, said Balfour's proposal of a referendum was dangerous and unworkable, and calculated to destroy free representative government.

Home Secretary Churchill addressed two meetings at Sheffield. He said no day passed without some of the Tory leaders overruling some ancient principle of the Tory party.

Churchill was again subjected to suffragist disturbances, several unruly persons being ejected from the hall.

GRAY HAIRS BANISHED.

The old idea of using sage for darkening the hair is again coming in vogue. Our grandmothers used to have dark, glossy hair at the age of seventy-five, while our mothers have a hair before they are fifty. Our grandmothers used to make a "sage tea" and apply it to their hair. The tea made their hair soft and glossy and gradually restored the natural color. One objection to using such a preparation was the trouble of making it, especially as it had to be made every two or three days on account of it working quickly. This objection has been overcome and by asking almost any first-class druggist for Wyeth's Sage and Sulphur the public can get a superior preparation of sage, with the addition of sulphur, another valuable remedy for hair and scalp troubles. Daily use of this preparation will not only quickly restore the color of the hair but will also stop the hair from falling out and make it grow. It is sold by all druggists for 50c and \$1.00 a bottle, or sent direct by the Wyeth Chemical Company, 71 Cornhill St., New York, on receipt of price.

For sale and recommended by W. J. Gilbert.

ARRIVAL OF BISHOP LAMBUTH AROUSES INTEREST.

Bishop Hoss Also Returns, But Will Not Arrive in Nashville Before Dec. 15.

Nashville, Tenn., Dec. 1.—Bishop W. R. Lambuth, who has been holding conferences in Brazil and supervising the mission work of the Southern Methodist Episcopal church in South America, has returned to Nashville. Bishop Lambuth and Bishop Hoss have been in the foreign field for some weeks, both arriving in the United States during the last week. Bishop Hoss reached San Francisco, Nov. 18, and after a visit to his family in Oklahoma, will arrive in Nashville about December 15.

The arrival of two of the leading bishops in the church at this time is a matter of decided interest, as the controversy over the control of Vanderbilt University will probably come up soon, as legal proceedings have already been instituted.

From 1910 to 1900, inclusive Easter will fall twenty times with March and seventy-one times in April.

Since John Quit Drinking

By John's Wife

"I'm the happiest little woman, in all this little town. And my merry little singing. Taken the place of sick and frowny. For John is QUIT his DRINKING. And he looks like a new man. And the world is like a paradise. With each happy in story. One day I read some verses—'Mary's Miracle,' the name. And I said, that's John's story. And I'll read and get the same. So I sent for GOLDEN REMEDY. And I put it in John's supper. And he said, 'I feel like a new man.' And I didn't taste a little bit. Had no odor, so, you see, it was smoothest kind of sailing. For little Doctor Me. And I watched and prayed and waited. (And cried some, too, I must say.) And I didn't have the greatest faith. I'm ashamed now to confess. And John never thought a minute. He was being cured of drink. And soon he's as well as any one. It makes me cry to think! Just makes me cry for gladness. I'm so proud to be his wife. Since he is cured of drinking. And leads a nice, new life."

"Since John has quit a drinking!" I can't say I'm sure enough. And he's as well as any one. And when I say my prayers at night I pray for John the most of all—Then GOLDEN REMEDY.

FARMERS OF SOUTH TURNING TO CORN

SECRETARY WILSON REJOICES THAT COTTON HAS RIVAL.

Boys' Clubs Quadrupled in Number—Youngsters Surprised Old Boys.

Washington, Dec. 1.—Secretary Wilson is rejoicing over the way in which he is getting the farmers of the south to turn to raising something else than cotton. He sees signs that a new era is at hand in the agriculture of the South.

Corn is the crop that is being given special attention in the Southern states. And it is the boys of the South that are taking hold of the raising of it.

No less than 16,400 boys in the South the past year raised an acre or more of corn under the eyes of experts of the department of agriculture. And they did so with surprising results.

Already the South is producing one-third of the nation's corn crop. The prospects are excellent that this proportion will be rapidly increased.

Dr. S. A. Knapp, formerly of Iowa, later engaged in rice planting in the South, is in charge of the demonstration farms for the department of agriculture. Year before last 12,000 boys undertook to raise corn under the eyes of the government experts.

Last year the number was nearly quadrupled, and Secretary Wilson thinks the number will keep increasing.

Modern Farming Methods.

What Secretary Wilson wants is to teach the boys better methods of farming. He is not so much concerned about the old men, those who have been farming the same way all their lives and have made no advances.

"It is not easy to get the farmer to change his way in farming," says the secretary. "But we can get hold of the boys and young men."

Astonishing yields of corn are being had on the lands where corn is raised after the methods directed by the department of agriculture. One

boy in South Carolina surprised the natives by raising 228 bushels on an acre. The great majority of them have raised more than 100 bushels to the acre.

The department, however, is not stopping with the training of the boys in the right way to raise corn. The next step is to teach them how to feed the corn to livestock, especially to hogs. Thus they will be taught to provide on the farms their own meat supply.

Various agencies are co-operating with the government in training the boys of the South to farm, more particularly to branch out into something else than cotton farming. The states are giving prizes and the counties are co-operating in different ways, individuals are assisting, and remarkable enthusiasm is shown. The funds available for the demonstration farming are partly furnished from private sources.

One reason why the department of agriculture is particularly interested in promoting the cause of better agriculture in the South is that so much interest has been awakened among the people.

"It is easy to teach folks who are earnest and enthusiastic about being taught," says Secretary Wilson.

The thing that is in large measure driving the farmers of the South to take up corn raising and general farming is the boll weevil. The spread of this enemy of the cotton crop has compelled the cotton raisers to think of something else than raising their staple crop. In this situation the department has been able to do wonders in promoting the cause of proper raising of corn."

INSPECTION TRIP

SUPT. BELL AND SUPT. BORROWDALE COME.

Huntington Row Is Being Torn Down and Removed by the Illinois Central.

On a regular inspection trip R. W. Bell, superintendent of the machinery department, and J. M. Borrowdale, superintendent of the car department, of the Illinois Central railroad, were in Paducah today. They arrived last night from the south. After an inspection of the local terminals today, they left for Princeton and Central City, and will return through Paducah tonight en route to Cairo and the north.

Huntington Row is history now.

The large double tenement houses are being moved and placed at new locations. One house has been located on Kentucky avenue at the corner of Fifteenth street. Other houses are being placed on the common west of the railroad shops. The railroad sold the houses.

Pains Gone

The Right Medicine

For weak women, who suffer from women's ills, there is a certain, standard medicine of proven merit—CARDUI, the woman's tonic. This great medicine has been helping sick women for more than half a century, and has come to be recognized as the standard, successful remedy for woman's troubles.

Letters reach us from all over the country, from women who have used CARDUI. Note this letter from Mrs. Nellie Duncan, 1917 So. 11th St., St. Joseph, Mo. She writes: "If

It will help some other woman, I am glad to send you my testimony about CARDUI. I had never been well since I came to womanhood, and suffered with female trouble until I could scarcely get around. Four bottles of CARDUI have done me more good than \$25.00 of doctoring. I feel fine and don't have that awful pain in my head and side. I can't praise the CARDUI Home Treatment enough."

CARDUI is a specific medicine for women's ills. It is a strengthening tonic for weak, worn-out women. Try it and get well and strong. At all druggists.

CAUSE AND EFFECT

A Year Ago We Inaugurated the Sale of Whiskies, Brandies, Etc.

Friends discouraged us in our new venture, simply because we were not on a retail street, that we had no bar, no free lunches, no benches or chairs to lounge on, and no show windows to display our goods. READ THE "CAUSE AND EFFECT" below:

CAUSE

We refuted the idea, claiming that the public were willing to walk a half block out of their way, were willing to dispense with the aforesaid attractions, if they can be convinced that they can buy almost two bottles of whiskey (quality considered) for the price they are paying for one, in other words, if we save them 33 1-3 to 50 per cent., and on some goods even more.

EFFECT

We have proved the correctness of our claim, we have built up a business beyond our most sanguine expectations, not alone in Paducah but in all the neighboring counties as well as in the near by Illinois towns.
